

Case Study _ Heritage City Locksmiths: Brother provides an instant return on investment with a cost effective solution

The customer

Heritage City Locksmiths are a Maryborough QLD based business with over 20 years' experience in the highly specialised fields of Home, Business and Vehicle Security.

The challenge

Heritage City Locksmiths required a cost effective Colour Laser Multi-Function device that was easy to use, had a small footprint, was Telstra Faxstream Duet compatible and could provide printing, copying, scanning and faxing functions at reasonable operating costs.

The solution

Brother worked closely with Heritage City Locksmiths solutions provider – EtouchOS to come up with the MFC-9340CDW, a machine that met all of their requirements including their high priority requirement of a compact Colour Laser Multi-Function machine with realistic operating costs and Telstra Faxstream Duet compatibility.

The product:

PRODUCT	MODEL NAME
Multi-Function Centre®	MFC-9340CDW
Consumable	TN-251BK, TN-251CMY, TN-255CMY, DR-251CL

The benefit

Brother was able to demonstrate a compact, reliable, cost effective Colour LED Laser Multi-Function solution that met all requirements. The proprietor of the business found the MFC-9340CDW easy to setup and is happy with the space available due the machines relatively small footprint. Heritage City Locksmiths have also had an immediate return on investment as the MFC-9340CDW and a spare set of toner cartridges was less expensive than the firm's previous quarterly toner expense.
