

Case Study

Precise Plumbing: Brother provides a robust & mobile printing solution into service vehicles

The customer

Precise Plumbing is Adelaide's leading maintenance plumbing services provider, combining old fashioned values with today's technologies to provide 'On time or its Free' guarantee to customers.

The challenge

Precise Plumbing wanted to equip all their service vans with laptops and printers so job invoices can be printed at the job site. The challenge was finding a mobile printing solution that was simple to use and a robust solution for on-site invoice generation.

The solution

The team at Brother went through a product demonstration of the PJ-523 Mobile Printer with Precise; showcasing the quality of prints and ease of use functionality. The product demonstration and trial allowed Precise Plumbing to see why the Brother PJ-523 Mobile Printer was the perfect solution in each one of their vehicles for their mobile printing needs.

The product:

MOBILE PRINTER	MODEL NAME	PJ-523
----------------	------------	--------

The benefit

Improving efficiency is essential to any business and the PJ-523 allowed for quick, convenient, professional invoices to be created on the job site, saving time and back office paperwork. Plumbers are now able to spend more time "on the job" and less time on paperwork.
